COMPANY INTRODUCTION

公司简介

我公司主要生产铝挤压型材及铝材的表面处理和深加工。其中铝材深加工包括铝材精切割、钻、车、刨、铣、折弯、焊接、CNC及组装等，可提供从原材料到铝制品成品的全套供应，也是一家服务光伏电站的太阳能光伏支架厂家，包括太阳能光伏支架设计、生产、销售及相关的咨询服务。目前已与国内多家光伏EPC总承包商、电站投资建设方和光伏电站业主方保持良好的合作关系。

公司始终致力于为全球商用、民用和公共设施的光伏系统提供专业、高效、全面的一站式支架解决方案，包括屋顶光伏支架系统、地面光伏支架系统、BIPV光伏支架等。

目前，我公司支架系列产品已遍布全国各地的光伏工程，主要应用于工业厂房、商业建筑、居民屋顶、农业设施、边远区域等。我们不断研发具有高可靠性、低成本优势的光伏支架系统，承接光伏系统公司的设计方案加工生产以及OEM订单。凭借多年的铝型材加工经验和专业的研发团队，我们不仅仅为客户提供单一的光伏支架产品，更为客户提供光伏支架系统全方位的设计和服务。不但可以根据客户的图纸加工，亦可以依据项目要求的对客户的设计方案进行优化组合，在满足项目所在地的荷载要求下提高光伏支架的性价比。

Our company mainly produces aluminum extruded profiles and surface treatment and deep processing of aluminum profiles. Among them, the deep processing of aluminum materials includes aluminum precision cutting, drilling, turning, planing, milling, bending, welding, CNC and assembly, etc. It can provide a full set of supply from raw materials to finished aluminum products. It is also a solar photovoltaic support manufacturer serving photovoltaic power stations, including solar photovoltaic support design, production, sales and related consulting services. At present, it has maintained good cooperative relations with many domestic photovoltaic EPC general contractors, power station investors and builders, and photovoltaic power station owners.

The company has always been committed to providing professional, efficient and comprehensive one-stop support solutions for photovoltaic systems in global commercial, residential and public facilities, including roof photovoltaic support systems, ground photovoltaic support systems, BIPV photovoltaic support systems, etc.

At present, our company's bracket series products have been used in photovoltaic projects all over the country, mainly used in industrial plants, commercial buildings, residential roofs, agricultural facilities, remote areas, etc. We continue to develop photovoltaic support systems with high reliability and low cost advantages, and undertake the design, processing and production of photovoltaic system companies and OEM orders. With years of experience in aluminum profile processing and a professional R&D team, we not only provide customers with a single photovoltaic support product, but also provide customers with a full range of design and services for photovoltaic support systems. Not only can it be processed according to the customer's drawings, but also the customer's design scheme can be optimized and combined according to the project requirements, and the cost performance of the photovoltaic support can be improved while meeting the load requirements of the project location.

Originating from the pursuit of quality and efficiency, the company has a complete fully automated production line and advanced production processes to ensure the stability and quality reliability of product production. Based on first-class products and professional capabilities to serve customers.

PRODUCTION EQUIPMENT

生产设备

源于对品质及高效的追求,公司拥有完整的全自动设备生产线,先进的生产工艺,确保产品生产的稳定性和质量可靠性,立足以一流的产品和专业的能力服务于客户。

COLOR STEEL TILE ROOF SUPPORT SYSTEM

彩钢瓦屋顶支架系统

产品介绍 Product Introduction

彩钢瓦屋顶安装系统对于商用或民用的屋顶太阳能系统的设计和规划具有极大的灵活性。它应用于将常见的有框太阳能板平行安装于斜屋顶上。独特的铝合金挤压导轨，斜装卡件，各种卡块和各种各样的屋顶挂钩能够被高度预装从而使安装简便快捷，节省您的人力成本和安装时间。

The color steel tile roof installation system has great flexibility for the design and planning of commercial or civilian roof solar systems. It is used to install common framed solar panels in parallel on sloping roofs. The unique aluminum alloy extrusion guide rail, oblique mounting clips, various card blocks, and various roof hooks can be highly pre installed, making installation simple and fast, saving you labor costs and installation time.

ROOF BIPV SYSTEM 屋顶BIPV系统

产品介绍 Product Introduction

对于已有一定使用年限或者出现局部漏水需要修缮的彩钢瓦屋面,如果要上光伏发电项目最好的方案莫过于采用BIPV方式,可以将光伏电站和建筑物完美相结合,可节约后续大量的房顶修缮费用,延长建筑寿命。

For colored steel tile roofs that have been in use for a certain period of time or require repair due to local water leakage, the best solution for photovoltaic power generation projects is to use BIPV method. This can perfectly combine photovoltaic power plants and buildings, saving a lot of subsequent roof repair costs and extending the building's lifespan.

GLASS TILE ROOF SUPPORT SYSTEM 琉璃瓦屋面支架系统

产品介绍 Product Introduction

琉璃瓦斜屋面光伏支架系统对于商用或民用的屋顶太阳能系统的设计和规划具有极大的灵活性。它应用于有框太阳能板平行安装于斜屋顶上,本方案采用独特的铝合金挤压支架,斜装卡件,各种卡块和各种各样的屋顶挂钩制作,主要由导轨,导轨连接块,中压,侧压,屋面挂钩组成。所有光伏支架配件在出厂前都经过高度预装从而使安装简单快捷,节省您的人力成本和安装时间。

The glazed tile inclined roof photovoltaic support system has great flexibility in the design and planning of commercial or civilian roof solar systems. It is applied to the parallel installation of framed solar panels on sloping roofs. This solution uses unique aluminum alloy extrusion brackets, oblique mounting clips, various clips, and various roof hooks, mainly composed of guide rails, guide rail connection blocks, medium pressure, side pressure, and roof hooks. All photovoltaic bracket accessories are highly pre installed before leaving the factory, making installation simple and fast, saving you labor costs and installation time.

产品介绍 Product Introduction

地面光伏支架系统的安装结构应该简单、结实耐用。制造安装光伏阵列的材料，要能够经受项目现场的各种严酷环境，确保25年的耐候耐腐蚀以及结构强度的稳固。热镀锌光伏支架和铝锌镁光伏支架都是常用的材质。

The installation structure of the ground photovoltaic support system should be simple, sturdy, and durable. The materials used for manufacturing and installing photovoltaic arrays should be able to withstand various harsh environments on the project site, ensuring 25 years of weather resistance, corrosion resistance, and structural strength stability. Hot dip galvanized photovoltaic brackets and aluminum zinc magnesium photovoltaic brackets are commonly used materials.
